Press Release

Azimut's partner Everton identifies a new gold target at Opinaca

Azimut Exploration Inc. ("Azimut") and **Everton Resources Inc.** ("**Everton**") announce that a new gold target has been identified on the Opinaca property (B Block) in the James Bay region, Quebec. The property is located east of the Eleonore property, which hosts the Roberto gold deposit owned by Goldcorp Inc.

The summer 2006 prospecting program has led to the discovery of the **Claude Target** where selected rock samples from sheared outcrops have returned up to **5.62 g/t Au**. Approximately 150 meters east of the **Claude Target**, and down-ice of the shear zone, four samples collected from two boulders (1 to 2 meter large), returned values of **35.98 g/t Au**, **4.69 g/t Au**, **3.54 g/t Au** and **3.28 g/t Au** (see appended map). The source of the boulders remains to be found but seems to be proximal.

The showing is associated with a northeast-trending deformation zone and consists of a silicified and mineralized paragneiss containing some quartz veinlets. The mineralization is composed of 3 to 5% disseminated pyrite with traces of arsenopyrite and molybdenite. It is located approximately 10 km south-west of the Manuel Showing on the Wildcat 5 property of Everton, where values up to 12.01 g/t Au over 4.6 meters from channel sampling have been recently reported.

A ground geophysical Induced Polarization (I.P.) program was recently completed on the **Claude Target** area. Results are currently being analyzed, and follow-up prospecting is planned to begin later this month on the I.P. anomalies.

Azimut owns a 100% interest in the Opinaca (B Block) property. Everton can acquire a 50% interest from Azimut by investing \$2.0 million in exploration work and may earn an additional 15% interest upon delivery of a bankable feasibility study. Everton is the project operator.

This press release was prepared by geologist Jean-Marc Lulin, the company's Qualified Person as defined by NI 43-101. Fieldwork is performed under the supervision of Marc L'Heureux, P. Geo. and VP Exploration of Everton, who acts as Everton's Qualified Person as defined by NI 43-101. Samples were assayed by Laboratoire Expert Inc. of Rouyn-Noranda, Quebec.

Azimut is a mineral exploration company using cutting-edge targeting methodologies with the objective of discovering major ore deposits.
